## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

International application No. Priority Date (day/month/year) (Farliest) Priority Date (day/month/year) PAPPLICATIOS/00689   19 August 2003 (19.08.2003)   (Farliest) Priority Date (day/month/year) PAPPLICATIOS/00689   19 August 2003 (19.08.2003)    This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.  This international search report consists of a total of search prior art document cited in this report.  1. Basks of the Report a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).  b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence disclosed in the international application, the international search was carried out on the basis of the sequence disclosed in the international application, the international application in written form.  filed together with the international application in computer readable form.  furnished subsequently to this Authority in written form.  furnished subsequently to this Authority in written form.  furnished subsequently to this Authority in computer readable form.  the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  Certain claims were found unsearchable (See Box I).  Unity of invention is lacking (See Box II).  4. With regard to the abstract,  the text has been established by the applicant.  the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applica	Applicant's or agent's file reference 26559		FOR FURTHER ACTION		ation of Transmittal of International Search Report IT/ISA/220) as well as, where applicable, item 5				
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.  This international search report consists of a total of sheets.  It is also accompanied by a copy of each prior art document cited in this report.  1. Basis of the Report  a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).  b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:  contained in the international application in computer readable form.  furnished subsequently to this Authority in written form.  furnished subsequently to this Authority in computer readable form.  the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.  Certain claims were found unsearchable (See Box I).  With regard to the title,  the text is approved as submitted by the applicant.  the text is approved as submitted by the applicant.  the text is approved as submitted by the applicant.  the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.  6. The figure of the drawings to be published with the abstract is Figure No. 1  None of the figures					(Earliest) Priority Date (day/month/year)				
applicant according to Article 18. A copy is being transmitted to the International Bureau.  This international search report consists of a total of									
a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).  With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:  contained in the international application in written form.  filed together with the international application in computer readable form.  furnished subsequently to this Authority in ocmputer readable form.  the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.  Certain claims were found unsearchable (See Box I).  Unity of invention is lacking (See Box II).  With regard to the title,  the text is approved as submitted by the applicant.  the text has been established by this Authority to read as follows:  With regard to the abstract,  the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.  6. The figure of the drawings to be published with the abstract is Figure No. 1  as suggested by the applicant.	applicant according to Article 18. ## Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

NEW ABSTRACT  A video signal has a visual image (12) and carries data for optical detection (54) via the image. The data for optical detection is encoded (52) as data bits in a plurality of lines within a defined region (14) within the image. A corresponding decoder (16,58) uses maximal energy methods to detect the defined region prior to decoding the data.
